[Swine Flu Vaccination Poses Serious Threat to Your Health](#)

Posted by Anders under [English](#), [Euromed](#)

[Print Post](#)

The US does [not allow any exemptions](#) from mandatory vaccinations.

21 June 2009: Change the word anthrax vaccine with flu vaccine and see your own possible sufferings ([video](#)). Squalene is in both insufficiently tested vaccines. Here is an ominous statement by the [Chicago Tribune on Apr. 25, 2009](#): "Baxter has patented technology that allows the company to develop vaccines in half the time it usually takes – about 13 weeks instead of 26"!!!!

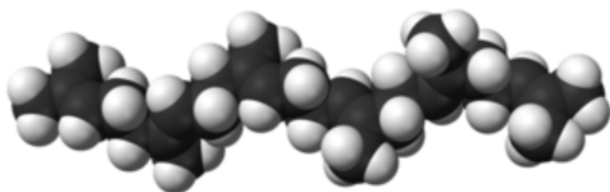

Remember, [it was Baxter](#) which recently delivered seasonal flu vaccine to 18 countries with deadly bird flu - discovered by coincidence.

However, the New World Order terror propaganda campaign is increasing: [The Independent 21. Juni 2009](#): The UK Health Department again announces that 40% of the population could be attacked by swine flu - and cost global domestic Product 2.5 trillion dollars - even though so far only 400 British have been infected!!

*[Global Research 13 June](#): It looks like governments around the world will either force these vaccinations on the public or launch a massive propaganda campaign to trick you into submitting to a jab. If they attempt to force these untested and essentially experimental vaccinations on you, **cite the [Nuremberg Code](#)**, which states: "The voluntary consent of the human subject is essential." No experimental vaccine should be "conducted where there is an a priori reason to believe that death or disabling injury will occur, except, perhaps, in those experiments where the experimental physicians also serve as a subjects.*

[Associated Press 16 June 2009](#)

*Schools are being put on notice that they might even be turned into shot clinics. Health and Human Services Secretary Kathleen Sebelius said Tuesday she is urging school superintendents around the country to spend the summer preparing for that possibility. No decision has been made yet on whether and how to vaccinate millions of Americans against the new flu strain that the World Health Organization last week formally dubbed a pandemic, meaning it now is circulating the globe unchecked. **But the U.S. is pouring money into development of a vaccine in anticipation of giving at least some people the shots.***

ATTENTION, Please: The WHO has declared swine flu (N1H1) pandemic. This will probably imply governmental demands for universal mass vaccinations under penalty for not complying. Flu vaccine contains **squalene oil** as an adjuvant.

Micropaleontologist Dr. Viera Scheibner conducted research into the adverse effects of adjuvants in

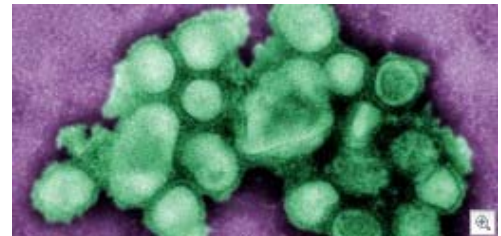

vaccines and wrote: ***Squalene “contributed to the cascade of reactions called “ Gulf War syndrome. GIs developed arthritis, fibromyalgia, lymphadenopathy, rashes, photosensitive rashes, malar rashes, chronic fatigue, chronic headaches, abnormal body hair loss, non-healing skin lesions, aphthous ulcers, dizziness, weakness, memory loss, seizures, mood changes, neuropsychiatric problems, anti-thyroid effects, anaemia, elevated ESR (erythrocyte sedimentation rate), systemic lupus erythematosus, multiple sclerosis, deadly Amyotrophic Lateral Sclerosis, Raynaud’s phenomenon with paroxysms of lack of blood in fingers and toes in fingers and toes, Sjorgren’s syndrome with blurred vision, chronic diarrhea, night sweats and low-grade fever.”***

Wikipedia A *study* linking squalene, as experimental vaccine adjuvant, to individuals with the clinical signs of Gulf War syndrome was published in 2002. **A U.S. Federal Judge ruled that there was good cause to believe aqualene to be harmful, and he ordered the Pentagon to stop administering it in October 2004.**

Something peculiar is going on: The Bilderberg meeting wanted to appoint the **WHO as the Health Ministry** of the **UN world government**. Now an unprecedented hype is taking place: A non-existing risk of a pandemic flu is being blown up out of all proportions by the WHO – and **without any measures being taken!** Does this New World Order organisation with a very **dubious reputation** (its first director was **Brock Chisholm** – founder of the World Federation for Mental Hygiene, which has **scuppered our culture**) play a trump card to promote itself in the New World Order? It might be inspired by looking at the **successes based on lies** like the **climate lie**, the home made **terrorism**, and now the also home made **financial crisis** as for financial gains and promotion of the New World Order. Then the conclusion that you can really achieve great results in terms of **world government** by mendacious scaremongering seems inevitable!!

The WHO declares the first pandemic in the 21. century

Reuters 11 June 2009 The World Health Organization declared the first flu pandemic of the 21st century on Thursday, urging countries to shore up defenses against the virus which is "not stoppable" but has proved mainly mild so far. However the WHO imposed no restrictions on travels or contacts between people.

"Moving to pandemic phase six level **does not imply we will see an increase in the number of deaths or very severe cases.** The WHO recommended drugmakers stay on track to complete production of seasonal influenza vaccine for the northern hemisphere's next winter in the next two weeks. Each year, normal flu kills up to 500,000 people and infects millions.

The Times 11 June 2009: So far it has caused relatively mild, cold-like symptoms with headaches and vomiting, with only 141 deaths among 27,737 cases in 74 countries worldwide since March, In Britain, the number of confirmed cases has risen steadily to 797, with about 40 fresh cases a day.

Deutsche Welle 11 June, 2009: UN Secretary General Ban Ki-Moon: ***Our best response is a firm demonstration of global solidarity.***"

This pandemic is a hype

The EU sponsored **Blogactiv on 06/05/09** quotes the Washington Post of 27 April, 2009 (now removed from the web) *“The media hype is not in any scale to the real threat, it can be good entertainment like circus in ancient Rome and a tool to put the common people’s focus on trivialities.”*

The following is from an article by **Stephen Lendman 10 June 2009 on the Global Research**

The industry-run US Food and Drug Administration (FDA) notoriously rushes inadequately tested drugs to market, putting their efficacy and safety into question, and turning those who use them into lab rats. **It includes everyone if a mass vaccination is ordered on the mere claim of a public emergency - no proof required.** If mass vaccinations are ordered, millions of Americans may ask: Why have you willfully and maliciously ruined my health?

Dangerous side effects of flu vaccinations due to vaccine adjuvant squalene

Immunologist Dr. Pamela Asa first recognized autoimmune diseases showing up in GIs that mirrored those in lab animals injected with oil formulated squalene adjuvants.

According to Matsumoto, today, ***“Squalene adjuvants are a key ingredient in a whole new generation of vaccines intended for mass immunization around the globe.*** Squalene is not just a molecule found in a knee or elbow - it is found throughout the nervous system and the brain.” When injected in the body, the immune system attacks it as an enemy to be eliminated. Eating and digesting squalene isn’t a problem. But injecting it “galvanize(s) the immune system into attacking it, which can produce self-destructive cross reactions against the same molecule in the places where it occurs naturally in the body - and where it is critical to the health of the nervous system.” **Once self-destruction begins, it doesn’t stop** as the body keeps making the molecule that the immune system is trained to attack and destroy.

Matsumoto says ***“Squalene is a kind of trigger for (a) real biological weapon,”*** what Soviet researchers called “a biological time bomb!” He and Dr. Pam Asa conclude that ***“Oil adjuvants are the most insidious chemical weapon ever devised,” including ones with squalene.*** So what American scientists conceived as a vaccine booster (or what’s now being developed in labs) was another ‘*nano-bomb,*’ ***instigating chronic, unpredictable and debilitating disease.*** **Using squalene in vaccines is outlandish and criminal.**

Gary Matsumoto is a New York-based award-winning investigative journalist. His 2004 book, *“Vaccine A: The Covert Government Experiment That’s Killing Our Soldiers and Why GIs are Only the First Victims”* took sharp issue with IOM results and the Pentagon’s denial of Gulf War syndrome.

Investigating the shadowy vaccination development world, he discovered US military-employed doctors and scientists conducted secret medical experiments on US citizens **in violation of the Nuremberg Code** and fundamental medical ethics.

According to Matsumoto, the Pentagon violated these and other standards, betrayed the troops, and the fundamental duty of military and civilian leaders to protect them. Since at least 1987, biowarfare development trumped the welfare of tens of thousands of GIs used as human guinea pigs for inoculation with experimental unlicensed anthrax vaccines containing squalene - administered **involuntarily without disclosure** of its

harmful effects to human health.

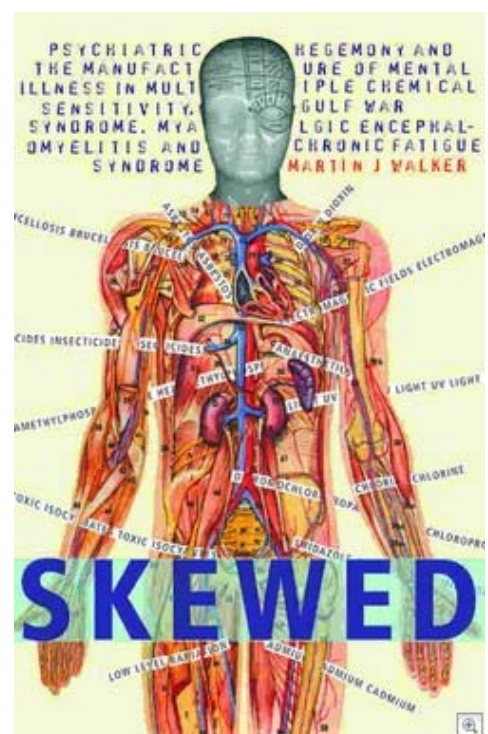

Matsumoto wrote:

“The unethical experiments detailed in this book are ongoing, with little prospect of being self-limiting because they have been shielded from scrutiny and public accountability by national security concerns.”

Other research shows that **squalene is the experimental anthrax vaccine ingredient that caused devastating autoimmune diseases and deaths for many Gulf War veterans from the US, UK, and Australia,** yet it **continues in use today and for new vaccines development in labs.**

“There are now data in more than two dozen peer-reviewed scientific papers, from ten different laboratories in the US, Europe, Asia and Australia, documenting that squalene-based adjuvants can induce autoimmune diseases in animals...observed in mice, rats, guinea pigs and rabbits.

Matsumoto’s book includes numerous case studies of GIs afflicted with one or more of the above syndromes, their devastating effects,

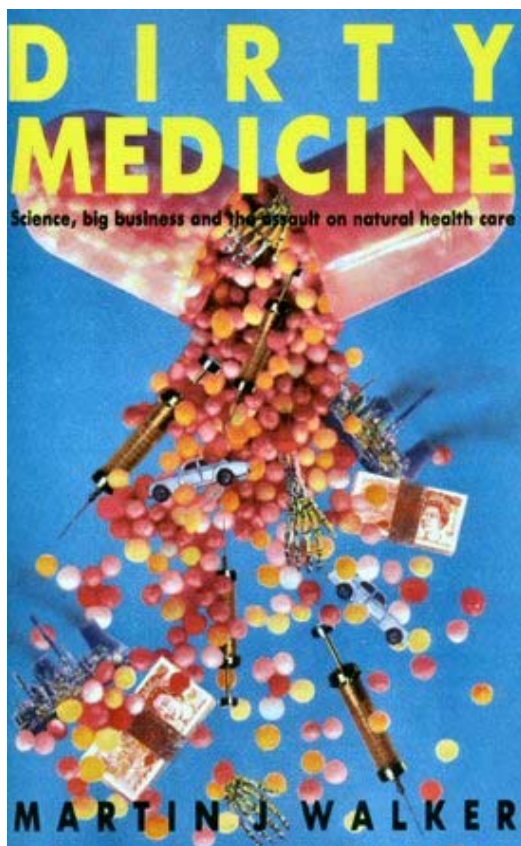

and the outlandish US government reaction - failing to acknowledge their existence or a connection between them and administered vaccines. Also denying the effects of other toxic Gulf theater exposures (like **depleted uranium**) as well as withholding meaningful treatments or protocols.

Money above others' health

So why does Washington sanction its use? According to Matsumoto: “**scientists in the United States are now literally invested in squalene.**”

Disturbingly, **many of the cutting-edge vaccines currently in development by the NIH and its corporate partners contain squalene in one formulation or another.** There is squalene in the prototype recombinant vaccines for HIV, malaria, herpes, influenza (**including the swine strain**), cytomegalovirus and human papillomavirus.” Some of these “are intended **for mass immunization(s) around the globe**” and that possibility should terrify everyone enough to refuse any mandate or doctor’s prescription to take them.”

Comment

Now the WHO hype is aimed at provoking mass hysteria over a non existing threat to humanity: Swine flu, a much milder A flu than seasonal flu. Such politically created hoax will probably be associated with **mandatory mass vaccinations** for no medical reason – but for the enormous profits of the New World order corporations and their “scientists” - as well as for global/political reasons.

The vaccine carries a risk of very serious complications. Firstly we remember the [Bayer's contaminations of products for hemophiliacs](#) with AIDS virus and this year [Baxter's contamination of seasonal flu vaccine](#) with deadly bird flu virus. However, there is also a very serious problem with the adjuvant of the vaccine: the oil **squalene, which is said to have caused the “Gulf Syndrome.”**

Is there a connection to the [illuminist](#) and self-conceited [world elite's depopulation programme](#) in their bid for their own [luciferian “godhood”](#)?

Here is an excerpt of what [I wrote on Jan 18, 2009](#): In the 1990's the UN's [World Health Organization](#) launched a campaign to **vaccinate millions of women in Nicaragua, Mexico and the Philippines between the ages of 15 and 45**, allegedly against Tetanus. The vaccine was not given to men or boys!

It was revealed by a Catholic organisation that the Tetanus vaccine contained human Chorionic Gonadotrophin or hCG, a natural hormone which when combined with a tetanus toxoid carrier stimulated antibodies rendering a woman incapable of maintaining a pregnancy. *None of the women vaccinated were told.* It later came out that **the Rockefeller Foundation** along with the [Rockefeller Population Council](#), the **World Bank** (home to CGIAR – a [Rockefeller agricultural control organization](#)), and the **United States' National Institutes of Health** had been involved. In addition, the **Government of Norway**, the host to the [Svalbard Doomsday Seed Vault](#), donated \$41 million to develop the special abortive Tetanus vaccine. [Global Research 11 June 2009](#): ‘A total population of 250-300 million people, a 95% decline from present levels, would be ideal.’ – Ted Turner to Audubon Magazine, 1996.

Motives for this pandemic hype

Do I have to reiterate that [bilderbergers and CFRs](#) like the former US Defence Secretaries Donald Rumsfeld and George Shultz have shares in the the Tamiflu-producing corporatin, Gilead, being on its board, Rumsfeld even as chairman 1997–2001? They now have a serious problem: *The [seasonal H1N1 has mutated into a form that resists the Tamiflu](#), although it is still susceptible to the Relenza (Glaxo-Smith-Kline) alternative. So, for these greedy New World Order charlatans it is vital to hype a swine flu pandemic. For swine flu virus is susceptible to Tamiflu!!! And the [sale of it is now soaring](#)!!*

[The WHO will now recommend](#) that pharmaceutical companies make swine flu vaccine. The U.S. government

has already increased the availability of flu-fighting medicines and authorized \$1 billion for developing a new swine flu vaccine. There is big money in this – and big opportunities to promote the WHO to be the health ministry of the New World order UN-government! [The Council on Foreign Relations 12 June 2009](#): "**What now kicks in is a greater sense of urgency for the pharmaceutical industry,**" says CFR Senior Fellow for Global Health Laurie Garrett

"Now that pandemic has been declared, more and more countries will guarantee that they will purchase vaccine if it is available, and WHO and World Bank will guarantee to purchase for the poorest countries in the world." [The Irish Times 13 June 2009](#): It would cost about €80 million to purchase a vaccine against the swine flu. *It had long been predicted that the WHO would declare the swine flu to be a level-six pandemic!!*

Dare you let yourself be vaccinated against a harmles flu virus – much less harmful than seasonal flu – by money– and powergrasping New World Order psychopats?

Not only is the Level 6 pandemic hype, it is deadly hype because people will now be stampeded into accepting either a deadly vaccine, made with a weaponized virus (which appears to have failed as a pandemic, but is treated as if it had succeeded, none the less, or quarantined.

The only solution which I can see for this deadly business is for all of us, right now, to demand the right to self quarantine.

Please see the Natural Solutions Foundation’s White Paper at <http://www.healthfreedomusa.org/?p=2752>. Then demand of your legislators that they allow YOU to decide if you want to receive the vaccine or self-quarantine, in keeping with both the Nuremberg Convention and the Universal Declaration of Human Rights.

This article is really well put together, especially in the face of having to convince sleepy people on this issue. The only disappointment was there is no share option.

Please try this it’s easy peasy. <http://www.addthis.com/>

I know I am forward n cheeky but it doesn’t make me a sleepy human, just tryng to help. And It saves having to contact and ask for permission to post n share get me. Please don’t take it wrong way.

<http://www.cannabisscience.com/news-a-media/63-42709-cannabis-science-inc-reports-on-prospective-life-saving-treatments.html>

SAN FRANCISCO—(BUSINESS WIRE)—Cannabis Science Inc. (OTCBB: GFON.OB), an emerging pharmaceutical cannabis company, reported today on the current state of development of its whole-cannabis lozenge in response to Homeland Security Administration Secretary Janet Napolitano's declaration of a public health emergency to deal with the emerging Swine Flu pandemic. The Company's non-toxic lozenge has properties that could alleviate many of the symptoms and harmful effects of the H5N1 bird flu and H1N1 swine flu viruses, and has offered its assistance to HSA today in a letter to Secretary Napolitano.

Cannabis Science Inc., President & CEO, Steven W. Kubby said, "We have the science and preliminary anecdotal results confirming the anti-inflammatory properties of our new lozenges and indicating they may present an effective and non-toxic treatment for minimizing the symptoms and harm from influenza infections. Our lozenges appear to down-regulate the body's excessive inflammatory response to the influenza virus, which could reduce the deadly consequences of an infection into something that is more like a common cold. Because of my cancer and diminished auto-immune functions, even common influenza is a deadly threat, and I've had incredible symptomatic relief with the lozenge."

Dr. Robert J. Melamede, Director and Chief Science Officer, stated, "The influenza virus has a unique genetic make up that, in combination with its replicative machinery, has an extraordinary capacity to mutate. As a result, the high lethality of some strains can be attributed to the resulting adult respiratory distress syndrome (ARDS). ARDS is caused by an excessive immune inflammatory response driven by Tumor Necrosis Factor (TNF) that leads to the death of respiratory epithelial cells and resulting organ failure. Endocannabinoids are nature's way of controlling TNF activity. Existing peer reviewed publications have shown that phytocannabinoids can prevent this cell death by mimicking the endocannabinoids that nature has selected to prevent excessive inflammatory immune responses."

I am the most humble and peaceful people you would ever meet, but this sort of development makes me want to pack a handgun in defense against forced vaccination. Thank you so much for including the Nuremberg and Squalene information. I am going to prepare a brief for myself and my wife, something we can keep with ourselves if forced vaccination ever comes to America. I'll include info from this article, and also detailed information concerned the last round of "swine flu" vaccinations that proved more deadly than the actual virus.

I will use this brief to battle against anyone who would forcefully vaccinate me. If it fails to turn the needle - I will fight to the death to avoid it. My wife and I have already made up our minds to die rather than take the vaccination. Not all went to the Nazi camps willfully. Some died rather than subject themselves to monsters. It seems monsters with needles have again come into the world, monsters with poison and death. **THIS TIME THE PEOPLE NEED TO STAND UP AND RESIST!**

5. *Anders* says:

[June 17th, 2009 at 17:36](#)

Hello, Gary.

I am nearly scared at the enormous attention my post has drawn - I guess no blogger in Denmark has ever seen that many readers, as I do today - 6.000 article visits so far.

No, Gary. No panicking. I don't want to let myself be vaccinated either. I once did have a flu vaccination - and got the flu for the first time in 30 years immediately thereafter!!

I would simply refuse to let myself be vaccinated - and take whatever punishment follows. I do not think they can enforce mass vaccinations in Denmark - nor in most of Europe. If the punishment in the US becomes too severe, you should - rather than dying- emigrate.

However, if you could mobilize a peaceful demonstration of 1 - 2 mio protesters in Washington D.C., I think your politicians would think twice. What about contacting the veteran's organisations. Many of them know the squalene danger from the Gulf Syndrome!

Don't despair. Act together with others - if possible.

Kind regards,
Anders

6. [Evita](#) says:

[June 18th, 2009 at 22:36](#)

This is amazing info - keep on spreading the word and waking people up!

There is no way my family is getting vaccinated. I am not sure how the laws work in Canada, I heard you can always use religious reasons to opt out of it. Either way - as Anders above said, I would rather take a penalty than go under this needle.

It is time for the world to wake up and speak out!

7. [joseph campo](#) says:

[June 21st, 2009 at 06:20](#)

It is amazing to see how Dr. Leonard Horowitz words on his you tube video has played out to be absolutely true. I have the upmost respect for this man. We as citizens to take heed and not fall prey to the big pharmaceuticals ploys.

8. [joseph campo](#) says:

[June 21st, 2009 at 06:34](#)

You may be interested in a web site <http://www.yoursmartroom.net>, They offer a fantastic product based on tried and true technology to deal with a pandemic, without being subject to mandated mass inoculations.
