Unanswered Chemtrail Questions... As Evidence Mounts

©By Dr. Ilya Sandra Perlingieri

6-7-9

With the groundbreaking research and unswerving personal dedication of Clifford Carnicom, Dr. Gwen Scott, and many others belonging to the various "skywatch" groups around the country, it becomes increasingly evident that the criminal aerosol Chemtrails assault to which we are continuously subjected is creating unmitigated havoc.(1)

Our immune systems are all under daily and constant siege. Here are some urgent, but unanswered questions relating to the ten-year-plus impact of possibly billions of tons of a poisonous soup of chemtrails, being sprayed on us, by military and commercial planes, for all of us to contemplate.(2) We must demand answers from officials --before our country is destroyed and a police state ensues. The window for accountability is increasingly small. Right now, all we have is a crumbling façade of deception by government officials. Connecting the dots for all of us becomes more urgent with each passing toxic day.

Look up at the sky! Really, look up. Look up frequently. Look up every day! The clouds are not real. The bizarre weather we now experience, on a daily basis, changes significantly throughout each day! Look at the planes with their deadly aerosols assaulting us! Watch how these "trails" spread and merge, and create a greyish cover over our skies. Last month, from Portland, Oregon, to Portland, Maine, I saw massive Chemtrail aerosol operations. Within a few hours, I received numerous calls from health-care providers about the spike in emergency room visits for upper respiratory problems.

None of this is natural! This level of toxicity may be mostly invisible, but it is not safe.

1. Why isn't the American Academy of Environmental Medical

[www.aaemonline.org] not looking at the impact of particulate matter, much caused by the toxicity of Chemtrail nano-fiber-coated aluminum that we are breathing with each breath? Their scheduled October 2009 conference ["Body Under Siege: Inflammation and Autoimmunity"] does not address this urgent issue. The US Air Force has admitted using it.(3)

2. How much of human "comatose" or "denial" behavior isn't actually caused by the toxicity of this nano-fiber-coated aluminum in Chemtrails? How much of this is causing widespread cognitive troubles? Aluminum is known to cause dementia. Even in early stages, people are not thinking clearly. This is not just a one-cause issue. There are multiple causes. [See the next paragraph.] However, damage to our cognitive functioning, on a daily basis and over a decade, is already showing much odd behavior. For now, however, it is reported as anecdotal.

There is also another aspect to deteriorating cognitive functioning. Americans are poorly educated and less well-informed than Europeans. It is easy to manipulate a population through Orwellian doublespeak and (ungrounded) fear when millions get their news [read: infotainment] from a carefully orchestrated media --85% of which is controlled by five corporations. Bread and circus (as in ancient Rome) masks the rapid collapse of our country.

3. Millions (possibly billions?) of infants and young children are now afflicted with a variety of chronic upper respiratory illnesses (asthma, chronic bronchitis, hard-to-treat pneumonia). Even now, with these epidemic levels, this is not reported as such by mainstream, corporate-controlled media. Breathing is now deleterious to our health. This, in itself, speaks volumes.

Children are suffering. Why are parents not demanding answers to their childrens' illnesses caused by these environmental poisons? Pharmaceutical drugs sometimes may alleviate symptoms (or cause worse ones), but do not cure. As Bill Moyers just wrote a few days ago: "How can we expect an industry that profits from disease and sickness to police itself?"(4) Why do we not demand prevention?

4. Why isn't every citizen self-testing to see if they have Morgellons (linked to exposure to Chemtrails)? A simple mouthwash test using either organic grape juice or merlot wine would demonstrate to each of us that no one is safe from these poisons. What kind of anger and demand for the cessation of these criminal activities would ensue, if millions of American knew their bodies were infested with these poisons? How outraged would we all be then, as walking Morgellons time-bombs?(5)

5. There is a new emerging field of "environmental cardiology." How many cardiologists actually know what Chemtrails are? Why is this discipline not looking into the link between the dangerous levels of barium in Chemtrail

aerosols and the dramatic increase in cardiac illnesses? Barium is known to damage the heart.(6)

6. Why are we all not demanding prevention and the Precautionary Principal (meaning: first, do not harm)? How many Americans even know what the Precautionary Principle is?

7. The Universal Declaration of Human Rights, the Geneva Convention [the very core of international human law], and US laws all forbid the use of humans as uninformed test subjects. For our safety, why is there not a massive grassroots movement being organized to force compliance to these international laws?(7)

8. We all have a basic human right to breathe air that isn't filled with deadly brews of aerosols (targeting all mammals), chemicals, bio-weapons, and thousands of other toxins. Now we are unwitting human laboratory rats for untold government/military experiments. What is the relationship to all these multiple poisons and now epidemics of multiple chronic illnesses (auto-immune, cancers, etc.) that so many people now have?(8)

9. All mammals are also seriously being affected by the toxicity of Chemtrails. Our companion animals are suffering greatly, too. Why is the alternative veterinary community so poorly informed about Chemtrails and how it affects pets? If there are alternative Vets who do know, why are they not writing in journals, magazine, and speaking out?

10. How has more than 10 years of this daily Chemtrail assault affected the chaotic and unpredictable weather we have? Winters with extremely warm weather. Snow in June. Early Fall in August. More earthquakes, hurricanes, floods, and typhoons. Yes, humans continue to cause enormous damaged to our fragile ecosystems. Yes, mega-corporations are wrecking the entire web of life. Short-term Corporate Greed is their bottom line, not sustainability or safety. In addition, how much of "Climate Change" has truly been caused by these aerosolized metals and other toxins that are sprayed into the air? Are years of aerosol spraying of Chemtrails the cause of Climate Change?

11. Why is our planet Earth losing atmosphere, faster than Venus or Mars?(9) How is the Chemtrail/HAARP assault affecting our atmosphere in other unknown ways? The military tampering with eons-worth of our planet's regulatory systems is being damaged in ways that myopic humans cannot either comprehend or foresee. This military assault has nothing to do with safety, but all to do with supremacy behavior and plans that are endangering the entire planet and all life support systems.

12. We no longer can look up and see normal, Mother-Earth clouds that have blanketed our planet from time immemorial. Why is a synthetic cloud called "asperatus" [meaning "rough" in Latin] being considered for inclusion by the Royal Meteorological Society as a "new" cloud? Clouds are created

by Nature. Chemtrail clouds are synthetic.(10) Where are any scientific Chemtrail reports from the Royal Meteorological Society?

13. Where are the REAL AND ACCURATE reports from thousands upon thousands of meteorologists reporting daily weather around the United States (and elsewhere around the globe) and the impact of synthetic Chemtrail and EMF clouds? The daily weather reports from these people are worthless and lack complete credibility without reporting the weather impact of Chemtrails. Have ALL the meteorologists been bought off or threatened? What has happened to Kevin Martin who was the only meteorologist reporting chemtrails (on his website, but now off line)?

Congress is broken. They are working for the banks and corporations. They are not working for us: "we, the people." They are no longer concerned with anything that will benefit American citizens. It is all a sham and an illusion to think that our political system is functioning at all. Writing two weeks ago, Paul Craig Roberts [author and former Assistant Secretary of the Treasury], reminded us that the corporations are ruling America.(11) Political corruption is rampant and endemic to this completely bankrupt system. Do we understand what this actually means?

So-called "leaders" are taking us on the fast track to the destruction of our country. Planning for a NW-Disorder, these people have no ethical or moral base. Out-of-control greed is all they know. This demonstrates the very worst of human behavior. War and destruction is profitable and growing; but all our social services safety nets are cut to the bone. This creates massive suffering and illness throughout the USA and the rest of the world. Why should our hard-earned tax dollars continue to go for lies, deceit, and epic fraudulent bailouts? If, as Bob Chapman, Paul Craig Roberts and others have written over the past week, we have a very small window [maybe only a few months] before the US economy completely collapses [how long can green toilet paper continue to be printed and countries believe these astonishing Fed lies?], it is urgent for us to WAKE UP NOW!

14. Where is the entire organic community? Where are the alternative health (both for humans and pets!) and environment communities? Where is help from MOFGA [Maine Organic Farmers and Gardeners Association] and Oregon Tilth that certify what is supposed to be "organic"? Where are the Bioneers? Millions and millions of American spend more on organics because they are supposed to be healthier and safer. Safer than what, if the air is permeated and the soil is laden with the devastation of Chemtrails? These Chemtrail toxins are now poisoning the entire food chain, and we are at the top of it.

15. Where are the thousands of eco, peace, and environmental non-profit organizations (that haven't been infiltrated) who truly care about sustainability and a safe and peaceful future? Why are they not joining together to put a stop to this?

There are quite literally millions of citizens who belong to thousands of these different organizations. Truly, we have the ability to unite and join together in these various organizations and create a massive and peaceful grassroots movement to stop this insanity! This is for our common good. This is for today and for a viable future for our children and grandchildren growing up right now. With Chemtrails poisoning us, there is no livable future. Americans are courageous people! We can step up to the plate. We must.

WHEN YOU RENEW YOUR YEARLY ENVIRONMENTAL MEMBERSHIP DUES, WITH IT DEMAND --RIGHT NOW-- ACCOUNTABILITY AND REAL CHANGE FOR OUR SAFETY AND PEACE! Think of the possibilities open to us with this kind of united action! A healthy population. Great social services! Communities united. Our children not going to bed hungry at night or without shelter. Children taught peace and social justice, instead of our young children going off to fight for the lies and deceit of three illegal wars. Now, thousands of them now come back in a coffin or physically and emotionally wrecked for life. Is this the kind of continued violent "future" we want for our children?

Think of what these "United" States could really accomplish with peace, ethics, truth, and justice! Think of the wonderful possibilities, if our children had a real education (and knew their history) and grew up healthy! Think of what this means for our children and grandchildren! No killing. No violence. No young Boy Scouts learning to shoot so-called 'terrorists"! [What an outrage to Robert Baden Powell's vision!] No children with autism, or cancers, or auto-immune diseases, or multiple chronic illnesses, or epic obesity. No children's hospitals. Truly healthy children. No elders left alone to suffer.

I want our children and grandchildren to go out and play in real, fresh air. To be able to take deep breaths of air filled with health. I want them to play in snow that isn't laden with barium, mercury, and nano-particles of poisons filled with bioweaponized aerosols of influenza and deadly illnesses. Think on this!

Do you remember, after a Spring rain, when air smelled sweet and fresh and clean? I want our children and grandchildren to be able to dangle their feet in a mountain stream, or in a lake that isn't a deadly spew of chemicals that seeps into their skin and poisons them along with the very creatures living there. I want our children and grandchildren to look up and see REAL CLOUDS and magnificent, deep blue skies! I want our children and grandchildren to be safe and healthy! Do you?

We cannot leave any of this to the Orwellian goons and criminals in charge of the Augean Stables Beltway. Their agenda is unmitigated chaos. Is THIS what we want to leave as a legacy for our children?

I am one of the survivors of the horrific, 1-million-acre 2003 southern California FIRESTORM that destroyed my entire neighborhood of 2,000. It left an enormous swath of death and destruction in its wake. Friends, neighbors, and small children were burned to death. This nightmare was caused by 14 arsons. It was not a natural fire. Yet, no one has ever been held accountable. It was all covered up and whitewashed. The president and other public officials all lied to us. Insurance companies (for those that even had coverage) deceived us. This is the US government's modus operandi today. No one in an official capacity who could help us did. FEMA was/is worthless. The mayor in San Diego did not return calls. Neither did the governor, or senators, or congress. Supposedly (on paper), they work for us. As our representatives, the overwhelming majority of them, did not respond.

The one rare exception was California State Senator Dennis Hollingsworth who did help us. Only one official did the right thing. The rest of these people do not belong in office. Basically, for years we have been left alone to try and put some other kind of life back together. But there was almost NO social network or safety net. Deceit is rampant. Hurricanes Rita and Katrina: Nothing is fixed. Tornadoes and massive floods: Nothing is really healed. Lives are devastated, while the rich are taking EVERYTHING for which we worked so hard for decades.

In catastrophes, this is how the US functions. There are trillions of taxpayer dollars for three illegal wars and fat bailouts of our money for CEO's salaries, but a pittance for catastrophe survivors. Further, many of us are now paying increased property taxes on burned destroyed land.

Do we want to wait for FEMA to drag us off --innocent citizens-- to unknown locations on US soil to inter us in "FEMA Camps" [read: prisons], or have our military knock down our doors and assault us or cart us off to who knows where? The US government did it to Japanese citizens during World War II. The US is doing this now, detaining and brutalizing people for years and years. All of this is illegal under our Constitutional laws, now deliberately trashed. The rule of law is gone.(12) What will it take for us to wake up from our stupor?

Do we want this kind of nightmare scenario to replay itself over and over ad nauseum? How long can we play the ignorant fools? Now, add on to this: the deliberately created financial debacle. Private banksters, elite insiders, and a shadow government have hijacked our economy and our livelihoods and our entire collective future. Look at the intentional havoc they have caused in such a short time! It is not just the fox watching the hen house. They are vipers.

Will you help?

We do have the ability to create a new paradigm of peace and true

prosperity. War and the chronic violence that is endemic to our society can be changed. We need to truly emulate the words of Martin Luther King's "I Have a Dream." We CAN create that dream!

We need to read, comprehend, and implement the works of Dr. Riane Eisler, Dr. Mae Wan-Ho, and Dr. Vandana Shiva. We need to heed the words of Dr. Rosalie Bertell.(13) These are ethical people who speak for true social justice, partnership, and peace. These are heroic people! We can emulate their visions! It is all do-able. Look around you. Search deep in your hearts. We humans have a long history of rising to the occasion under extreme circumstances. Even within a short time frame, this is possible!

It is the eleventh hour.

Think of the words of Margaret Mead: "Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it is the only thing that ever has."

Dr. Ilya Sandra Perlingieri is the author of the critically acclaimed, "The Uterine Crisis" that London's The Ecologist calls "an inspiration."
