Alert: CBS Outlet Calls for Chemtrail Pics--Fire Away!

Friday, February 04, 2011 12:58

How long will we be polluted and blocked from the sun? It's enough!!!

by Zen [Gardner](#)

OK, they want photos. So, let's send them photos! The following article from an Atlanta CBS [affiliate](#) (I know..) ran a piece and is claiming to want to know more. So, let's give it to them.

Here's the story excerpt from the [intelhub post](#) on BIN today:

"Looks like the subject of chemtrails got some mainstream coverage out of Atlanta when a local CBS affiliate ran a story televising details.

CBS - *"These are literally crimes against humanity, nature,"* said Michael Murphy, a chemtrail researcher from Los Angeles. Murphy produced a documentary

believes the chemicals in the chemtrails, [aluminum](#), barium and others are making us sick.

CBS is requesting pictures to be sent to them of chemtrails along with comments.

CBS Atlanta wants your chemtrail pictures. Send them to pics@cbsatlanta.com.

Send away, people! I've sent a big batch and they've posted them! Maybe someone will listen!

More important---Then [contact](#) your local paper, weather channel, EPA office, local [government](#), and say "Why aren't YOU doing something about publicising this outrage like they are?"

If you google your local papers for their contact information, you'll get a list of reporters and editors and their email addresses. Bcc them all! But be polite and let them know you're "so happy someone is finally willing to finally address this subject that's been in our faces for so long and polluting our skies etc." like this is gonna catch on. "Will someone here be brave enough too?"..or however you want to phrase it.

This is a chance to unload. We can at least try one more time, and maybe a tidal wave of Truth will hit the mark! Let's be response-able and do what we can. It holds people accountable and that changes a lot behind the scenes as well.

Hit it any way you can, and be true to the [calling](#)....Zen

PS. BIN will publish current chemtrail pics to help track where they are in real time to further expose their [program](#). Download the app and it's pretty straightforward. There's loads of great chemtrail sites to help as well and use their info to help people know what's going on.

But whatever you do, post wherever you can, talk to people, take pictures, every little bit makes a BIG difference!

Here's the [video clip](#) of the [news broadcast](#) (thanks IntelHub):

Hey Zen, I did write to my congress-critters. Not one of them answered. Very strange because I have been writing to government officials for 30 years and have always gotten some sort of reply. Now the sound of silence disturbs me. Last time I wrote the EPA they cut off my medical benefits for several months...also they did not reply.

Not surprised--this one's a biggie and makes people fearful even to talk about--all the more reason to keep firing away! Way to go! Try the weather station and local EPA, they really squirm cuz they're in on it too.

I've only gotten one reply in two years. Wait till you see it. It took several months for the EPA to get back to me. The "official" response is purely Orwellian, how they're all naturally occurring contrails i.e. water vapor due to varying climatic conditions, blah blah.

The amazing thing is they dare to publish the most outrageous chemtrail shots as examples, including the wild one with the parallel loops we

always see proving they're turning around and performing tricks at the same time.

It's signed and sealed by several agencies so you can see who's willing to put their stamp on it - all big insider military agencies.

Stay tuned, I'll get it together--want to put counter arguments but maybe I'll just send the "piece of work" as is. Cheers.
