Chemtrails: There's An App for That

Thursday, March 24, 2011 8:56

by Zen Gardner

Wanna know when the chemtrails are coming? Check your phone and look at the forecast.

Yes, the "weatherman" is in on it, folks, and they know the spray days. All to make it look "natural".

See for yourself

clear blue sky in San Diego this morning. Sure enough, that nasty filmy cloud was over the sun on my iphone weather app.

Probably gonna be chemtrails today. It may turn out to be a real weather system coming in but let's see what happens. It's been clear a while and the chemtrails are overdue. They may also be laying low somewhat with the increased radioactivity from Japan, especially in the upper atmosphere.

We've had nice clear skies for partial days with the rains and wind clearing the air. We may have more moisture coming later as real clouds (which did happen) but too often this stringy cloud over the sun foretells chemtrails. Follow the weather and the forecasts closely and you'll see this to be true. A perfectly blue sky with no real clouds nor reason for them will be turned into an overcast or partly overcast day, all by chemtrails, as you watch them sprayed in the sky, and you'll see that forecasted on your phone.

They haven't been able to spray for days so I know they're itching to get their levels back up, so I decided to document it.

Today at 10:30 am it looked like this:

Nice. On the horizon just over the ocean, the natural look is a darkish haze from the pollution in the area. When that is white, it's usually a bank of chemtrails coming in, unless it's a real front, which is much less frequent. Looks so far like they haven't started spraying, but they could be out there. I see it happen a lot.

And then...

2 hours later I checked outside at 12:30, and this crap is over our heads. It even has that telltale evil HAARPed out pattern as well. (This came in before a bank of real clouds followed later on its heels.)

Thinking HAARP's active is never a comforting thought, especially with the Pacific Ring of Fire seeing so much activity.

These only appear periodically, but they do appear, sometimes also displaying the rainbow colors but always in an odd shape.

Same time as the above shot.

One of their ploys is to lay the banks of chemtrails way out at sea and float them on shore, so they appear to be natural weather changes. You can spot the tell-tale signs that these are chemtrail or chemtrail augmented clouds, especially the clear spray of filthy chemicals in the above left.

Chemtrails do attract water vapor under certain conditions and sometimes morph into more natural looking formations, almost like a disguise. Sometimes, however, there's not a lick of moisture and it's just horrible cross patterns as they fill in from

sky.

But keep looking--they'll often separate out and you'll see the chemicals dispersing at different rates force the chemtrails to give themselves away for the death dealing crap that they are.

Try to tell me this one I just shot is "natural"....

They don't spray during windy days over about 25mph, although they do spray above clouds, snow and rain. Just wait for a break in the clouds and check for the trails.

Here along the coast we'll have coastal fog and it'll clear to an absolute mess they've been spewing for hours. (coastal fog clearing lower left and bottom center. 2 days ago)

So, the weatherman is in on it?

It it any wonder, when Raytheon is involved.

"Enabling Death and Destruction Daily!"

Raytheon

complex that runs America 's permanent wars, **Raytheon Corp** is already profiting from new weather warfare technologies. The world's fourth largest military weapons maker bought E-Systems in 1995, just one year after that military contractor bought APTI, **holder of Bernard Eastlund's HAARP patents**. Raytheon also owns General Dynamics, the world's leading manufacturer of military Unmanned Aerial Vehicles.

Raytheon reports the weather for NOAA through its Advanced Weather Information Processing System.

[Source](#)

All weather forecasting and reporting is now routed through this central Raytheon system. No wonder the weatherman won't say a peep about chemtrails and they so often don't even show up on TV radar--it's doctored. Chemtrails and their cover up is a concerted, military controlled effort.

Welcome to Orwellia.

And no wonder they're also involved with HAARP. Nice one-two punch. The military industrial complex rolls on.

More on Raytheon, HAARP, Chemtrails and the Weather

Raytheon Corporation, the world's fourth largest military weapons command, fabrication, and contracted operations facilitator, bought the HAARP patent after only a short time, effectively placing the US Air Force and US Navy in the power seat without labeling them so. Raytheon is the same corporation, at a standoff with Northrop Grumman, **who runs the US Air Force's federal jetliner aerosol programs for military radarweapons conductivity enhancement**, which is openly stated as "global warming mitigation."

Aside from being co-management, with other corporate political military entities of the UKUSA group, of the ECHELON base, the world's biggest global on-demand electronic invasion surveillance system situated in Europe, Raytheon runs bomb experimentation, laser weapon creation, and **now actually reports the weather for NOAA through Raytheon Information Services' AWIPS (Advanced Weather Information Processing System) computers,**
 in direct link with their UAV

weather modification units and radar weaponry systems programs. NOAA gave them over \$300 million for this currently active, 10-year project.

Thus, **weather reporting**, for businesses and scientific organizations everywhere, **is customtailored** for publishing as the Department of Defense manipulates it to be through their various programs. [Source](#)

These are nasty people, mad military fake scientists experimenting with our planet and its people.

Keep exposing them. The darkness cannot stand the light.

Nice post Zen. I know first hand that   
Raytheon/General Dynamics supplies almost all the communication technology in the Marine Corps, but I didn't know they were involved with HAARP and chemtrails. Not that it's surprising lol. The military industrial complex is the most disgusting group of human life on the planet. I'm glad to have absolutely no affiliation with it anymore.

Posted by [Don Quixote](#) on Friday, March 25, 2011 6:06

I've got those funny clouds over my head   
right now. Yes, I've noticed that the weatherman has caught on. Used to be they'd be surprised by the sudden clouding but not anymore. My weather report says partly cloudy now when they are spraying.

Posted by [Anonymous](#) on Friday, March 25, 2011 8:09

If you really think chemtrails are real,   
why don't you organize a team of pilots and scientists to fly up into the air to collect samples, bring them back down, and analyze them? Posting articles about it is surmount to slacktivism. It's not going to do a damn thing to stop it or raise awareness.

Find out what's in the air for sure, and maybe you'll have a case.

Posted by [Don Quixote](#) on Friday, March 25, 2011 11:10

Many people have collected the fallout   
from Chemtrails. Watch the documentary "What in the World Are They Spraying" to find out what they found.

Posted by [Anonymous](#) on Friday, March 25, 2011 1:50

OMG! i took pictures and videos today as well to show this! the sky was a beautiful clear bright blue, but by the afternoon it was all chemtrailed up.   
I also (stupidly)got a nasty sunburn..probably from the radioactive cloud moving about.

Anonymous, it is already a known and proven fact that chemicals are being released into the air and you don't need to go into the atmosphere to find out, it is down at our level, we breathe it in. Please refrain from commenting on important issues when it is clear that you have not put enough effort into researching the problem that has been affecting us for over a decade.
