★ Why Is Google Earth Deliberately Hiding Google Sky Images @ 5h 53m 27s -6 10' 58 ?

[Report abuse](#)[Post a question](#) [Terral03](#)Level 1
2/15/11

Google Sky Administrators have deliberately blacked out a section of space that contains the recently-discovered Elenin Comet approaching Earth from the Leo Constellation that show a brown dwarf with three small moons in earlier photographs documented here:

http://www.youtube.com/watch?v=l_tUFBOtMJM

We have images from South Pole Observatories of the approaching brown dwarf and Google is deliberately hiding this fact from the world population. Everyone can plug the above coordinates into Google Sky and see the black empty square. This ELenin Comet was supposedly discovered by a Russian using an 18-inch backyard telescope and the object reaches perigee position on September 11, 2011 exactly ten years to the day after the 9/11 attacks. The third conjunction told by the NASA orbit charts say the third conjunction takes place on November 22, 2011, or the same day that JFK was assassinated. In fact, I can find no reporter on earth that has interviewed LEOnid ELenin, which is a code for the brown dwarf approaching from the Leo Constellation for an Extinction-Level Event. Should Google be responsible for blacking out this very important information from Google Sky, and the people are not warned about the March 15, 2011 pole shift, then everyone at Google will be held accountable before his Creator; and you can take that down inside your cozy underground bunkers. My Brown Dwarf Event Timeline explaining everything is here:

<http://www.usmessageboard.com/conspiracy-theories/154857-the-planet-x-nibiru-elenin-brown-dwarf-timeline.html>

There is no need to answer why Google is part of this Global Conspiracy, because there is no shame in your game. You can also delete this warning as evidence of your deliberate willingness to keep people in the dark, but The Almighty who knows the number of hairs on your head sees every little thing you are doing; and each victim will visit you in the lake of fire for all the ages to come. A copy of this message is posted at the US Message Board at this address:

<http://www.usmessageboard.com/conspiracy-theories/155254-google-is-deliberately-hiding-nibiru-images-5h-53m-27s-6-10-58-a.html#post3323092>

This is what appears at 5h 53m 27s -6 10' 58 that Google is deliberately hiding as part of a Global Conspiracy:

<http://i29.photobucket.com/albums/c266/Terral03/nibirupic.jpg>

Here is the truth of what is happening: <http://www.youtube.com/watch?v=8a56W4vaqk0>

Hi

Turn on you Google Earth Community layer this could have been discussed there.

Best regards

MM

Hi Mason:

I doubt it. Supposedly the Elenin Comet was recently discovered in December of 2010 (Leonid ELenin a Russian - supposedly) and this blacked out section of Google Sky just happens to contain that image! Leonid Elenin is a coded message: <http://www.godlikeproductions.com/forum1/message1354798/pg1>

I agree Terral...they don't want us to prepare but get face on death when planet x comes our way...Google is part of the conspiracy and every single employee in Google is accountable for what would happen to humanity for deliberately blocking this crucial info...think about your family and loved ones...you ain't getting an elite ticket to hide underground...you will be left as others.

If any Google employee could uncover the truth it would be great...you think we are stupid...its clear as the skies that you deliberately blacked out the part where niburu is coming..if that was not enough...now you are running around with Elinin and few months back it was Betelgeuse star supernova etc..

Perhaps Google could fool a tribesman who has not seen the stars through a telescope but even he could call your little trick a bluff..its soo obvious..next time try to be a bit more smart than blacking out any portion

Hi Lavista:

The troubling part is that Google knew to block out the image at 5h 53m 27s -6 10' 58" some three years 'before' (2007) this fake ELenin guy discovered the so-called comet that is hidden from view (2010). I have updated information: The March 11, 2011 9.0 Japan Quake shifted Earth axis 4 inches like the Feb. 27, 2010 8.8 Chile Quake shifted Earth axis 3 inches last year. Both of these events took place at Sun/Earth/ELenin alignments! The Sept. 4, 2010 7.4 Christchurch Quake also took place at an Earth/Sun/ELenin alignment, when our Planet was on the opposite side of the Sun. We have another alignment coming on Sept. 26, 2011, but this time the ELenin Dwarf Star will be only .396 AU from Earth and directly between the Sun and our planet!!! That is when we expect the pole shift to take place that will terraform this planet by flipping the whole world upside down. We then expect a pole shift reversal on way to the third alignment on November 22, 2011 on the day that Rothschild murdered JFK. The NASA orbit data for the ELenin Comet says this object reaches perigee on September 11, 2011, or exactly ten years after the 9/11 attacks. The plot to this story reads like an Extinction-Level Event movie with Illuminati secret codes embedded into everything ...

Terral

This is just missing data. It's already been noted here in the Sky Data Problems Compendium:

<http://bbs.keyhole.com/ubb/ubbthreads.php?ubb=showflat&Number=1292281#Post1292281>

If you scroll down to the bottom of the first post you can download the file which includes an overlay from a different source.

This is what the author of that post has to say:

"Missing data - There's actually quite a bit of missing data. With as many pieces of imagery that it takes to cover the whole Sky, there are bound to be little bits here and there that get left out, and I found about a hundred or so. There is no conspiracy to hide anything from anybody, if a piece of the Google Sky imagery is missing, you can find the data in a variety of other sources, SIMBAD is my favorite external source, because it provides access to many, many other sources of astronomical imagery. But it's also possible that the missing piece is present in Google Sky's imagery at other wavelengths. In the "Layers",

"Featured Observatories", you can examine a piece of Sky at InfraRed, Microwave, UV, and X-Ray wavelengths."

Still, conspiracy theories are way more fun than the truth I suppose :D

If you had followed MasonicMoron's advice and turned on the Sky Community layer, you would have come to this post and discussion:

<http://bbs.keyhole.com/ubb/ubbthreads.php?ubb=showflat&Number=923555&an=>

Hi Noise:

<http://www.youtube.com/watch?v=Kbpwr31NZBI>

Missing data my eye. ELENin Comet = brown dwarf star w/planets in tow.

<http://ssd.jpl.nasa.gov/sbdb.cgi?sstr=elenin;orb=1;cov=1;log=0;cad=1#cad>

The dwarf star broke the ecliptic plane on March 4, 2011 with the first conjunction on March 11, 2011 that shifted Earth axis 4 inches with the 9.0 Japan Quake like last year on Feb. 27, 2011, when Earth axis shifted 3 inches with the 8.8 Chile Quake at the ELENin Comet alignment.

<http://www.youtube.com/watch?v=Qi7wpEIGU0I>

Nibiru Event Timeline: <http://www.godlikeproductions.com/forum1/message1367678/pg1>

The timeline information was gathered from the NASA data for their ELENin Comet Psyop:
<http://www.godlikeproductions.com/forum1/message1354798/pg1>

What Google/NASA Are Hiding: <http://www.usmessageboard.com/conspiracy-theories/155254-google-is-deliberately-hiding-nibiru-images-5h-53m-27s-6-10-58-a.html>

Google knew to block out the ELENin Comet three years before the thing was discovered by Leonid ELENin the Russian using a remote 18-inch telescope in New Mexico.

<http://www.youtube.com/watch?v=UcJzLBcDdzM>

25 Symptoms of Nibiru: <http://www.godlikeproductions.com/forum1/message1368630/pg1>

The earth changes going on all around us are happening because the dark star is bringing a massive gravity well and magnetic field/polarity that is heating up and disrupting the Sun and all the planets in our solar system. That is why the earth magma is heating/rising up and lubricating the tectonic plates and making volcanoes waken from sleep.

The magnetic poles are not shifting, but are migrating from the magnetism of the brown dwarf that has polarity control over all the planets in orbit around that dark star; and trying to wrestle polarity control of the Earth from the Sun. Animals have magnetite in their tissues being disrupted by the dwarf affecting the Sun affecting Earth magnetosphere that is fluctuating and throwing the animals off their regular migration routes.

Nibiru Safe Zones: <http://www.godlikeproductions.com/forum1/message1372295/pg1>

Once you finally wake up and realize that the crap is going to hit the fan in your area (happening all over Earth), then have your food, water supply, survival gear and guns and ammo to defend them. Join together in groups with people of like mind to circle your tents/wagons and defend your survival supplies and families. Seek caves and caverns for shelter against the solar storms later this summer near the Sept. 26, 2011 pole shift.

The people coming for you and your family are not the Chinese and not the Govt or people wanting your gold and silver. They will be hungry and desperately trying to survive and if you are not ready that person will be you.

Where's googles response in all this?? I've got two theories on it.

One: google wants the publicity.

Two: they actually have something legitimate to hide.

Where's the love google. If you want to hide something that could be potentially catastrophic to this entire planet, why would it be worth it? Your going to die with us.

Something else that's disturbing about the coordinates is that it's sides are not parallel to eachother. I don't know much about telescopes and their imagery, but it doesn't seem like it's an image that was forgotten by accident.

Here is a link to a video debunking this claim. http://www.youtube.com/watch?v=_VZY115vfYk
The images used in google sky are from 1958 and 2007. You can view the originals if you look for them and there is no black spot when you do. Another Hoax debunked.

Wiki

http://en.wikipedia.org/wiki/C/2010_X1

Check out this document on seismic activity, you can see that Elenin is causing earthquakes of high magnitude on earth.. (check near K and M)

<http://arxiv.org/abs/1104.2036>

this is the link where you can check the trajectory of elenin.. (you need java installed)
this is the nasa link so its not something fake... nasa would only fake to hide. see below

<http://ssd.jpl.nasa.gov/sbdb.cgi?sstr=elenin;orb=1;cov=0;log=0;cad=1#cad>

well... if elenin is so small and ineffective why is the WHO stocking over 500,000 coffins in georgia?
just google 500000 coffins and you will get lots of pages and videos....

its just begun... the worst is yet to come..

The issue i have with Google blacking out a certain part of the sky to hide the truth, wouldn't it be a safe bet to assume that Google who own Youtube would also stop people putting items on you tube which

Level 1
8/18/11

were explaining what was going to happen.

I believe in all this stuff i'm just putting a question out there.

The blocked out area in Google Sky over in Orion turns out to be nothing. The ELenin Dwarf Star crosses Venus orbit on August 22, 2011 to reach Mercury orbit on September 5, 2011. The solar flares will transition into solar storms between September 5 and September 11 at perigee. Watch this video: <http://www.youtube.com/watch?v=NIMSdBzywNg>
