How Israel Plans to Rule the World: Part 1 The Plan

By james at winterpatriot.com

With all eyes focused on Egypt at the moment, the following is written to further place the Egyptian protests in the larger context of the wider turmoil in the world and the dominant force that is shaping not only Egypt's future but this world's future with it.

I will attempt to illustrate the power of this force by outlining it in three separate posts being parts 1, 2 and 3-

The Plan
The Strategy in principle and
The Strategy in action: using the disaffection in Egypt

THE PLAN

There are a number of major forces in the world today but by far the most aggressive of them is the force that lies behind the state of Israel, Zionism. And the force that lies, in turn, behind Zionism is the international bankers and, in particular, those bankers that form the Jewish clique who are by far the biggest players within the banking circle. They control the two most influential central banks in the world, the Bank of England and the Federal Reserve Bank of the the US. They also control the body that co-ordinates central banks throughout the world, the Bank for International Settlements in Basle Switzerland.

Actually, these bankers are not principally bankers at all but rather men, families, that are world dominionists. They intend to rule the world and they are well on the way after two hundred years of planning and manoeuvring. Money from banking is their primary tool. All their other power, influence and domination flow from this. The pre-eminent family amongst these bankers is the Rothschilds. Heinrich Heine, a poet-philosopher and banker's son said of James Rothschild, "Money is the god of this world and Rothschild is his prophet". Note the quote stated "his" prophet. Heine personified this god. This personified god of money has a name, of course. Mammon.

To tie these families together through the generations and ensuring continuity, something stronger than 'family ties' is needed. Something of a religious nature is needed: something that offers reward beyond the grave for these worshippers of money and power; these worshippers of Mammon.

Another Rothschild, the founder of the House, Mayer Amschel Rothschild, has been quoted as saying, "Permit me to issue and control the money of a nation and I care not who makes its laws". This quote indicates the primacy of issuing a nations money in the power hierarchy. So the plan from the beginning was to form banks and then central banks (which would control and co-ordinate all the other banks within a country) and, through whatever means necessary, gain the position of issuing a nation's money. And, indeed, they do in most countries in the world including the major powers, America, England and Europe. With this power to create virtually unlimited amounts of money as they did in a blatant display of this power in connection with the so called "bank bailouts", they can then buy their way into the upper echelons of commerce, industry and finally political power, the aristocracy. And they have; making connections, 'friends' and allies and fostering their dependency upon the bankers and their money. Money is also a drug; a drug of addiction.

With this power they have bought their way into strategic industries in particular such as oil, food, and armaments. War making uses vast amounts of these resources and manufactured items together with equally vast amounts of money to finance their purchases. These bankers win on both sides of the ledger. There are huge profits to be made from war for these people. Of course, if banks and the armaments industries were nationalised by the governments of the world, this huge pressure for war would disappear overnight. Until that day, this insistent power and forceful influence on the world's governments will persist because with their money they can buy the

2% BELOW POVERTY LINE IN EGYPT.

election of compliant politicians. These same politicians then extend the open US public purse towards Israel and in the process pay back multiple times their electoral bribes.

It becomes an insidious roundabout. Indeed, there is a practice in America called the "revolving door policy" whereby individuals shift from senior positions within these strategic industries, into influential government positions and then back and forth again. Through this process, the government and major industries in America have been captured by the bankers and turned to their purposes. This power then inevitably extends into the United Nations.

With this power and influence, the Rothschilds and the other Jewish banking families that they have gathered around them have managed to have the state of Israel proclaimed in their favour and carved out of the living body of Palestine in 1948. It was their beach head in their political invasion of the Middle East. This granting of someone else's land to unwanted immigrants by people on the other side of the world who neither owned nor resided in the country was a disaster for the Palestinians: a disaster for the rest of the Middle East countries immediately surrounding them, especially Egypt now; and, indeed, a coming disaster for the rest of the world.

This disaster that is extending out from Palestine and calling itself Israel is still ongoing and will form the base for these Jewish bankers to become a world power in terms of armed forces and resources as well as their existing world power in financial terms. This will mean that they no longer have to suffer the present vulnerability of living off the largesse of the American public. (The state of Israel is not economically viable without this largesse.) They will be able to exploit their conquered neighbours resources and squeeze the maximum from transit fees through the Suez canal. They will no longer have to coerce and negotiate with other powers, their 'friends' and allies to fight their wars for them. They will simply be able to launch them at their whim. Although, of course, they will almost certainly expect their US and European 'friends' money and arms to do their bidding, they will no longer be dependent and therefore vulnerable to a reversal of fortunes as they have been and are still now.

There may be only one worse ultimate fate than becoming a 'friend' of a Mafia Don and that is to become a 'friend' or ally of a Rothschild or an ally or 'friend of Israel', the Rothschilds' very own country. Israel has betrayed one ally after another. They are presently betraying Egypt, its long term "Partner in Peace". Egypt is planned to be another stepping stone for these bankers on their way to being a world power. They plan to then use to this 'super' Israel to rule over all the other powers using the American and British peoples and their armed forces together with those of NATO and affiliated treaty organisations.

The nations of America and Britain in particular are being turned into massive war machines and bled dry. Non-strategic industries have been closed down or moved overseas principally to China causing mass unemployment and leaving the workforce a choice of employment in the armaments and tributary industries or directly in the military forces. This is an example of the fate of Israel's allies. Egypt is another.

So with all these resources at their command, how do the bankers through their very own little country intend to go about bringing the whole world to heel? They have a strategy which is very simple and they have been using it for well over a hundred years through the governments and armed forces of Britain and America. It is termed, "balkanisation" and Egypt is the latest example if things go according to plan for them (which, so far, it appears it isn't). Balkanisation involves destroying a nation through various means including wars, civil wars and civil uprisings and to break it up into small ethnically or religiously based states.

This power through destruction is a good description of the power of evil. This simple destructive strategy will be the subject of the next installment, Part 2. An examination of this process underway in Egypt (but still uncertain) will be the subject of Part 3

This is the reason why non-whites are allowed to invade and displace white people in America, Canada, Australia, and the nations of Western Europe. The Jewish elite only pretends to care about non-whites, but in truth they are only using them to balkanize us.

More US War Crimes: Mutagenic Weaponry

No one really knows the truth. And they never will because the rabbit hole goes deeper and deeper without end. Yes, maybe the jews own a lot of things. But the question to be asked is "who is in the shadows"...because that is the relevant dark force. After all, us serfs only know what we are told or read. Has anyone ever experienced the "other side"? Are there any credible witnesses?

Here's some light reading. Is it really the jews? Is it ancient bloodlines? Is it the Jesuits...the black pope? Who really is running things? Good luck on that one! I've been searching for years, and as soon as I think I have an inkling of understanding, I discover something new.

I suggest you read at a minimum the link below.
