Newly published research in leading journals AGAINST fluoride and vaccines

Carl Herman, *Contributing Writer*
Activist Post

Excerpts below, articles [here](#) and [here](#). To understand that Big Pharma and "health care" companies do not act for the public benefit, continue reading the excerpt from [this](#). Explanation, documentation and proof that US corporate media makes the choice to keep Americans ignorant of these game-changing stories is [here](#), with an excerpt of one game-changing examples.

Advertisement

Fluoride:

"The prolonged ingestion of fluoride may cause significant damage to health and particularly to the nervous system," concludes a review of studies by researchers Valdez-Jimenez, et al. published in *Neurologia* (June 2011), reports New York State Coalition Opposed to Fluoridation, Inc. (NYSCOF).

The research team reports, "It is important to be aware of this serious problem and avoid the use of toothpaste and items that contain fluoride, particularly in children as they are more susceptible to the toxic effects of fluoride." (1)

"Fluoride can be toxic by ingesting one part per million (ppm), and the effects are not immediate, as they can take 20 years or more to become evident," they write.

Most fluoridating U.S. public drinking water suppliers add fluoride chemicals to deliver 1 ppm fluoride (equal to about 1 milligram per quart) intending to benefit teeth and not to purify the water.

Vaccines:

A shocking new study published in a prestigious medical journal has found a direct statistical link between higher vaccine doses and infant mortality rates in the developed world, suggesting that the increasing number of inoculations being forced upon children by medical authorities, particularly in the United States which administers the highest number of vaccines and also has the highest number of infant deaths, is in fact having a detrimental impact on health.

AdChoices ▶

The study, entitled *Infant mortality rates regressed against number of vaccine doses routinely given: Is there a biochemical or synergistic toxicity?*, was conducted by Neil Z. Miller and Gary S. Goldman. It was published in the reputable *Human and Experimental Toxicology* journal, which is indexed by the National Library of Medicine...Despite the fact that the United States administers the highest number of vaccine doses to children in the entire developed world, 26 before infants reach the age of one, its infant mortality rate is higher than 33 other nations, all of which administer less vaccines. The study clearly illustrates the fact that developed countries which administer less vaccines have lower infant mortality rates, suggesting a direct statistical link between vaccination side-effects and infant deaths.

For example, the two developed countries that require children be immunized with the least amount of vaccines, Japan and Sweden, also top the table for the lowest infant mortality rates.

Big Pharma, "Health care":

The cartels taking billions of our dollars are in many industries. Dr. Marcia Angell, former Editor in Chief of the *New England Journal of Medicine* and currently a Senior Lecturer at Harvard Medical School [documents](#):

"The combined profits for the ten drug companies in the Fortune 500 (\$35.9 billion) were more than the profits for all the other 490 businesses put together (\$33.7 billion)."

Importantly, "profit" is distinct from "research" in understanding these figures. This is prima facie evidence of unlawful collusion among a cartel, yet government doesn't investigate. [Dr. Angell concludes](#) that US government will never provide universal health care because both political parties' "leadership" obeys health insurance companies' lobbyists rather than legislate for the public good. The lack of health care kills about 45,000 Americans every year according to the [recent study championed by Harvard's Medical School](#). Cost-benefit analyses range between \$100 to \$300 billion annual cost increase to the US by keeping health care companies between doctors and patients.

Corporate media "reporting":

You should also know that the [King family's civil trial found the US government guilty of Dr. King's assassination](#) (click link for a summary and documentation of the overwhelming evidence). US Corporate media refused to cover the trial or interview Dr. King's wife. His family's opinion is that the US government murdered Dr. King to end his protests against unlawful US wars and his call to end poverty.

In conclusion: The century within which we were all born witnessed over 250 million human beings slaughtered by governments in war and atrocities. War is used as a continuous "foreign policy," with the US in present egregious and unlawful abuse of their superpower status. History will judge when Americans developed the education competence to evolve beyond endless wars.

We can help make that time now.

Carl Herman is a National Board Certified Teacher in economics, government, and history. His hobby is research, education, and lobbying for improved public policy. A principal project of his 30-years' experience working with US "leadership" in government, economics and corporate media was to grow the citizen's lobby, **RESULTS**, that led to two UN Summits (1990 **World Summit for Children** - the largest meeting of heads of state in world history - and the 1997 **Microcredit Summit** - topic of the **2006 Nobel Peace Prize**). Because US political leadership of both parties reneged on each and every public and private promise to end poverty, and US corporate media behaved as their political propagandists, Carl shifted his hobby to "follow the money." His conclusions are explained and documented in these two articles (academic/professional voice, and more passionate citizen voice):

Open proposal for US revolution: end unlawful wars, parasitic economics
Common Sense for new American Revolution: revolt from US government by dict's

"The lack of health care kills about 45,000 Americans every year..."

"...the number of people having in-hospital, adverse reactions to prescribed drugs to be 2.2 million per year. The number of unnecessary antibiotics prescribed annually for viral infections is 20 million per year. The number of unnecessary medical and surgical procedures performed annually is 7.5 million per year. The number of people exposed to unnecessary hospitalization annually is 8.9 million per year.

The most stunning statistic, however, is that the total number of deaths caused by conventional medicine is an astounding 783,936 per year. It is now evident that the American medical system is the leading cause of death and injury in the US."

http://www.lef.org/magazine/mag2004/mar2004_awsj_death_01.htm

It's very obvious that 783,936 is a much greater number than 45,000. In fact, the 45,000 number is used in an attempt to get people to become one of the 783,936 deaths caused by health care per year. That number is not high enough for those that use the number 45,000 to try to scare people into DEATH BY MEDICINE! Nice work, Activist Post! Shilling for the death amchine by pretending to be against it. Isn't that called CONTROLLED OPPOSITION?

Carl Herman said...

You're comparing apples to oranges. You don't do your own dental work, don't set your own broken bones, and have probably had your life saved by PROPER medical care.

The topic of INCOMPETENT or INJURIOUS medical "treatment" is different.

Your comment distracts from the topic of the post: published research about vaccines, fluoride, and the reasons "health care" corporations and corporate media don't serve the public interest.

Who are you shilling for?
