“DRILL” – LARGEST IN NATIONAL HISTORY...IS IT A DRILL?

NUCLEAR LOCKDOWN IN NEW YORK

CENSORED TERROR “DRILL” MOST COSTLY IN HISTORY

“More checkpoints per square mile than Baghdad”

By Gordon Duff STAFF WRITER/Senior Editor

Busloads of police were brought into New York, some from distant communities. The national press, generously called the “mainstream media” reported none of this today. There was a defacto news blackout about the scale and nature of what is happening in New York City today.

Checkpoints have been set up around New York, a city closed down, “tight as a tick.” We are told the “drill” is designed to test the ability to detect “dirty bomb” materials but intelligence sources tell us that the idea of a “dirty bomb” is something out of TV drama and phony White House briefings.

“About a million ‘dirty bombs’ went off in Japan and you can read about it this week on page three of the shopping guide. Next week it will be on the comic page. New Yorkers have had the same illnesses that the Japanese are now concerned about for years, results of an unreported ‘nuclear event’ sometime around 2001 or so. We know hundreds are dead and thousands are sick and it never made the sports page, much less ‘page three.’

Dirty bombs are a ‘pipe dream.’ Real nuclear weapons are out there. Why use something cumbersome and hardly as lethal or dangerous as the scare mongers rant about when newer nuclear weapons fit in a shopping bag.”

The biggest terror “drill” in American history, the biggest security crackdown ever and nothing

is announced other than a few moments of local traffic report from CBS New York featured above.

The story in New York is that the city is testing its capability of detecting a "dirty bomb" or other "radiological device." At a time when most municipalities are flat broke, busted, New York is spending an unprecedented amount, in what is said to be a drill. The city is hunting four "imaginary terror groups."

On the methods used to detect radiation, [Dr. Doug Rokke](#), former top Pentagon WMD expert and VT staffer told this reporter:

The standard equipment and rad detection procedures just does not work that is why we created, tested, validated, issued specialized rad equipment (AN PDR 77 with RPO kit) and techniques during DU (depleted uranium) project for which I as the director.

We modified the existing AN PDR 77 to do this work.

You can have lots of junk there to create serious med problems and never find it using conventional equipment and swinging meters in the wind.

TV coverage shows sheepish residents and commuters cowed into unquestioning acceptance.

Intelligence reports, however, place real alert levels "off the scale," in particular for weapons that are far more threatening than "dirty bombs."

However, those same intelligence reports make absolutely no mention of any Arab based groups, despite very purposeful attempts to create background for such an attack. That has been done recently through, in particular, these acts which now appear to be carefully staged:

- The Terry Jones Koran burnings, some have been killed already, thousands are flocking to join the Taliban and Americans are said to be targeted around the world because of this. Jones has broken laws and there has been no attempt to rein him in. Jones now appears to be something very different than he pretends to be. Jones is a devout Zionist, "Israeli firster" and follower of the bizarre apocalypse heresy that infects many of America's religious extremists. Jones now appears to have "handlers." ***Jones worked in Europe for 30 years. Nobody knows what he did there*** but he is hardwired to the top of America's Neocon elite.
- The Raymond Davis incident now appears to have been a purposeful provocation with a pre-staged scenario meant to destabilize Pakistan and recruit terrorists. Corrupt members of police agencies and key government and court officials were already in the pockets of the rogue "CIA" elements responsible. These were not CIA and Davis has never been CIA. We are told the Davis' organization was responsible for the Mumbai attacks.
- The republishing of photographs depicting murders in Afghanistan by American troops, photos of no news value, meant only as a backdrop to a new "terror attack" on New York City.
- Infiltration and control of peace groups by Israeli agents in what they describe as an "anti-delegitimization campaign." In documents received by Veterans Today, much more sinister implications are revealed, including bizarre and frightening intelligence operations against Judge Goldstone and others who question Israel's policies that many deem "apartheid."

Just weeks ago, Israeli military intelligence announced it had created a special unit to monitor, confront, and possibly hunt down, individuals and bodies suspected of "delegitimizing" Israel abroad. In light of this, perhaps quite a few of the faint-hearted felt standing up to Israel was not worth it...Ilan Pappé, University of Exeter

The intelligence reports may not have mentioned Arabs as terrorists but they did refer to the Israeli military intelligence group mentioned above as having more components than simply hunting down and killing dissidents and academics.

THE THREAT – GAZA BLOCKADE TO BE REDEFINED AS "PIRACY"

The pre-staging is there but what is driving it? American troops began withdrawing from combat in Afghanistan 6 weeks ago, abandoning key areas to the Taliban, though casualties have, particularly since the Terry Jones Koran burning, been higher than ever.

In Libya, according to Neocon "wingnuts," America is assisting Al Qaeda, the mythical and non-existent terror organization created by the Department of Justice, in taking over from the Khadaffi regime.

The biggest real threat is to "status quo" in Israel. With most of the Palestinian population expelled, replaced by one million "guest workers" from the Philippines, Thailand and across Asia, Gaza, now a virtual ghetto, has been bombed daily. The new government in Egypt, always subject to a military threat from Gadaffi on the western flank, is likely to take a hardline with Israel on what they see as treaty violations by Israel. It is unlikely that the new Egyptian government will accept the legitimacy of the Gaza blockade Israel is currently enforcing, a blockade which required the full cooperation of Mubarak's regime.

According to international law, there can be no blockade without full control of all borders. With Mubarak gone, Israel's blockade of Gaza, should Egypt choose, and they are expected to do just that, will have no legal foundation. The Congress of Paris in 1856 established applicable international law covering blockades. Any blockade that can't be enforced is considered a "paper blockade" and "sporadic attacks on shipping or commerce" are considered "piracy."

As soon as Egypt opens their border with Gaza, Israel's blockade is immediately reclassified as piracy.

BLAMING IRAN IS KEY

Piers Morgan of CNN may have "let the cat out of the bag" this week with his "interview" of Jesse Ventura. Out of nowhere, Morgan went on a rant about the need to attack Iran in order to protect Israel. The context, oddly enough, was his insertion of this call to arms in the midst of an anti-war discussion with activist Ventura. Morgan's continual use of "everybody knows" to insert Israeli intelligence agenda and talking point items showed something beyond desperation:

1/1 - Jesse Ventura on CNN w Piers Morgan (04.0...

[YouTube - Veterans Today -](#)

Morgan's task, carefully coordinated with Israeli military intelligence, AIPAC and "wingnut" websites like "FamilySecurity..." is to make certain that when, not "if" but "when" an massive terror disaster hits America, all eyes turn to Islam and Iran or Iran and Pakistan.

The NYPD seems, however, to have not gotten the message and "bent over" as needed.

You might ask why New York is always the target. You might ask who controls so much of the infrastructure of the city and has the ability to derail any criminal investigation and even civil litigation.

Intelligence sources indicate that there are far more than four "fictional" terror cells in New York City today. Some are said to have the appearance of ties to Islam. As with the "crotch bomber" and the "Times Square Fizzler," a look beneath the surface says something very different.

Good luck NYPD.

The real terrorists are Israel and Israel Firsters and their agents. Homeland Security should arrest Janet Napolitano, Michael Chertoff, those at the SPLC, AIPAC, ADL, US congress, white house etc.

Arrest all Mossad agents and other Israeli and US spies who are working for Israel.

That pesky question as to why the area around the Israeli embassy is a radiological hotspot would disappear instantly and they could once again blame evil doing on this weeks paty-in-chief. If the current readings are high enough around the embassy then if you pretend a dirty bomb has gone off you can then shift the blame to (you guessed it) this weeks paty-in-chief. We all know what happens next.

From an article dated 2-7-7 at rense.com:

One alleged radiation hot spot on Manhattan's east side has the potential for becoming a political hot spot: A strong radiation spike from the area of the Israeli Embassy. Officials would not comment on why they thought that particular area allegedly showed such a stunning peak in radiation.

What if the "stunning" peak of radiation were found at the Iranian Embassy instead of the Israeli one? Would not an immediate raid be in order? Especially since we are worried about a foreign nation with nuclear capacities and materials sneaking in such to our country to create a "dirty bomb" scenario. Maybe one that could be blamed on Iran, as Brezinski has warned.

The HAARP/Stuxnet Fukushima disaster, for the Israelis, will be the gift, the ultimate distraction, that will keep on giving: 1. It will change the calculus and timeline for "Israel's demise", pre-empting the growing global chorus of Israel critics, many of whom will be scrambling to just survive. 2. It certainly taught the Japanese a lesson that will not be able to "go it alone" in regards to the NWO (Zionist controlled central banking) per Benjamin Fulford. The Japanese culture now faces annihilation. 3. The growing anti-nuke sentiment arising from the Fukushima disaster will only work in Israel's favor, as it continues to hide its burgeoning nuclear arsenal. 4. The coming population crash due to induced environmental and economic factors (Gulf of Mexico oil spill, Fukushima, food hyper-inflation) will reverse Israel's growing demographic marginalization due to the world's burgeoning population. 5. Reviewing global air mass circulation looks to leave Israeli's sphere of influence, Asia Minor, relatively unscathed by the radiation plume now covering the northern hemisphere (US, western Europe, Russia, China); Israel will emerge as the major world power, as the rest of

the world struggles merely to survive (thanks to the US). Israel has its own system of underground bunkers 6. Israel's host and erstwhile ally, the United States, will disintegrate, due to the Fukushima disaster, Gulf oil spill, disastrous economic policies pursued in the wake of the so-called 911 attacks (inside job); and for Israel, who looks upon the dominate Christian theology as anathema to Judaism (Jews are blamed for killing Jesus), removing an eventual and persistent existential threat.

Tip:

I was in NYC in '06 when the light aircraft smacked into the building. "No terrorist but it gave everybody a scare" ha ha ha. They think we're all stupid, but regular people in NYC were not buying it. That was the first season that the numbers of people doubting the "official" 911 story was blown off the charts. Very few people in Manhattan give the government the time of day on 911. Even more now than before think Bush did it, with loads of help from "art students."

Anyway the tip:

The East Side, from about the MET museum on up till Park Avenue runs up to Harlem is the Hive. Seriously. This area is "where the money is" it's also not America by a long shot. I had business at the museum and I had breakfast in Enemy Territory. On this, JB Campbell is not

only right, he's too conservative. Just taking out the CFR's location will not do. This whole area is an alien base working its dirty deeds on us from the protected outpost of rich fuckers on the East Side.

They have worked and plotted here since Trotsky and probably before. This is where they direct the conquest of America (and then the world). I don't know how we take it down at the moment, but we have to take it down!

On 911 there were war games going on which confused the people protecting the United States. That really helped the Mossad do 911.

During the 7/7 London train bombing their was a terrorist simulation going on. That also seems to have been a Mossad operation, especially since Netanyahu received an advanced warning and then screwed up when mentioning who gave it to him.

Well, let's hope the Mossad doesn't do anything nasty during this drill.

It seems this drill is being used to set up the American people for a nuclear false flag in the United States by the Mossad. Be careful Iran.

Israeli company, Magal Security Systems-owned in part by the government of Israel has security control of US nuke arsenal

If true it means the US does not control its nuclear arsenal, that Israel has veto power over our use of nuclear weapons and that the nuclear inventory is secure only to the extent that Israel determines. The Pentagon and Homeland security are in Zionist hands. Effectively the United States is held captive by Israeli operatives.

American supporters of Israel were delighted to learn that an Israeli company, Magal Security Systems-owned in part by the government of Israel-is in charge of security for the most sensitive nuclear power and weapons storage facilities in the United States.

Not only does Magal provide security for American nuclear facilities, but it also does likewise for most major nuclear facilities in Western Europe and Asia.

Abstract thinking is a talent developed out of realizing personal misbehavior results in a physical ass-kicking. No body likes a physical ass-kicking. GE thought for years before it was settled where to put the largest commercial fission plant at Fukushima on the edge of the ocean at the most active tsunami zone anywhere. Not if, when. This exercise is bullshit by the 9-11, GOM. and now the Fukushima(and other plants not reported on) perpetrators. Congress still mewls. SCOTUS can't wait to feed patriots' children to Benny the Rat. Shut down the government and the NWO=OWO team will cut right and go through what is left of America's Constitutional defense like Georgia tech over Cumberland back in 1962. These bozos writing in to shut down government do not realize that the fascists are waiting in the wings to dive on the corpse being offered up by their own beaten mentality.
